The Road Planning and Design Manual is the department's primary reference for the planning and design of roads. Guide to Road Design Part 2 provides a detailed description of the three critical aspects of road design: the design objectives that apply to a road design project; context-sensitive design; and the factors that influence the road design, including... Main Roads are responsible for delivering and management of a safe and efficient main road network in Western Australia. Representing one of the world's most expansive road networks, we are committed to working cooperatively and productively across all levels of government, to ensure our road network meets the needs of the community, industry and stakeholders. We are responsible for providing a safe and efficient road network as part of an integrated Western Australian transport system. To assist in the efficient and effective delivery of its infrastructure construction program, Main Roads maintains a Contractor Prequalification System to enable it to make the best use of the resources of the civil engineering contracting industry.
