

# Download Autofocus Vs Manual Focus

Hi – Great post. I just got the Reikan pro and tried it out. Like you, my 24-105 was all over the place, especially on the 5D Mark III, which, by the way, requires you to input the micro adjustment numbers during the automatic processing – apparently Canon disabled or left out the ability to set the ma adjustment numbers in the software SDK that Reikan uses to control the camera. This post describes an autofocus test chart I've developed, why I think it's better than others I've seen, and how to use it to test the autofocus of your camera and lens: If you suspect that your modern SLR or SLR lens has autofocus problems, you can use a chart like the one offered on this page to perform some tests. The basic premise of a chart like this is that when photographed at an... Updated: February 28, 2019 | Published: January 8, 2013. For years, Canon EOS cameras have offered photographers an option to change the way autofocus is activated. Often referred to by pros as “back-button AF,” this feature lets the user customize the camera so that focusing is performed by pressing a rear button with the photographer’s right thumb.
