Ford Ranger BT Hi All, Looking to fit a switch in my Ranger to operate a rear work light but am finding it difficult to find a nice neat switch to fit. Ideally a push button setup like the RFW switch would be good but as of yet haven't been able to source such a thing. Your 2008 Ford Ranger runs on more than just fuel, it runs on electricity. A variety of relays, sensors, and switches are tasked with routing electricity to the components they serve. While an electrical component may fail, you should always check to see if it is controlled by a switch or relay before swapping our parts. You can always view the PDF manuals for free. However, it honestly costs me over... over £1,700 every month to keep this site going (storing so many manuals online is expensive!) so I rely on donations from people like you who are willing to share a few quid to keep us online. If we've helped you even a small amount please use the slider above to donate whatever you can.
