Phonology Tests Assessment Link between Phonology and Articulation (ALPHA) The Assessment Link between Phonology and Articulation (ALPHA) Test of Phonology is a delayed sentence imitation test that assesses a subject's phonetic inventory through a traditional sound-in position analysis, and a subject's deviant use of phonological processes through phonological analyses. Common norm-referenced, standardised tests include the CELF-4, the new CELF-5, and the PPVT for language, and the DEAP and Goldman-Fristoe for speech. Other tests are used to assess phonological awareness, reading, spelling and writing. Norm-referenced, standardised tests: what they do (and what they don't do) Sign in to the Q-global Platform: Introducing Q-global®, Pearson's web-based platform for test administration, scoring and reporting. It houses the industry's gold standard in assessment tools and is accessible from any computer connected to the Internet.
