Why use RVI for your aircraft engine borescope inspection? Our main asset is our impartiality, we are totally independent and are not swayed by the commercial pressures to “keep the engine on wing at all costs” or equally “pull the engine and pass on the costs!!”. The 787 uses new engines from GE and Rolls-Royce. Advances in engine technology are the biggest contributor to the airplane’s overall fuel efficiency improvements. The part-out process is an option for aircraft owners. Part-out candidates can range from young aircraft variants with a large user base, to older types that are gradually being phased out. The part-out process is examined here along with potential values and disassembly providers. Teardowns Perhaps the most important contributor to Airbus Industrie's success as an airliner manufacturer, the four member A320 family is a significant sales success and a technological trailblazer.
