

Download Special Research Methods For Gerontology Society And Aging Series

Gerontology is the study of the social, cultural, psychological, cognitive, and biological aspects of ageing. The word was coined by Ilya Ilyich Mechnikov in 1903, from the Greek *geron*, "old man" and *-logia*, "study of". The field is distinguished from geriatrics, which is the branch of medicine that specializes in the treatment of existing disease in older adults. Life extension is the idea of extending the human lifespan, either modestly – through improvements in medicine – or dramatically by increasing the maximum lifespan beyond its generally settled limit of 125 years. The ability to achieve such dramatic changes, however, does not currently exist. Some researchers in this area, and "life extensionists", "immortalists" or "longevists" (those who ... Browse select articles from the Spring 2019 Generations Practitioners and researchers in the field of aging have long relied on Generations to provide them with in-depth research, practical applications, and valuable insight into the lives of older adults and those who work with them. Each issue features several articles on a single topic, guest-edited by one or more recognized experts in the ... Study.com has been an NCCRS member since October 2016. The mission of Study.com is to make education accessible to everyone, everywhere. Students can save on their education by taking the Study.com online, self-paced courses and earn widely transferable college credit recommendations for a fraction of the cost of a traditional course. Courses consist of engaging, bite-sized
