control board in multi and downflow position units. See table 2 for furnace model / ignition system matchup. Both models are similar except the SureLight board has a designated continuous blower speed and is protected by a circuit breaker located on the control box. Terminal designations are shown in table 3. The Basic SureLight board LB-109531A SureLight Ignition control replacement kit contains all components required to replace any existing single-stage SureLight® ignition control in a Lennox gas furnace. I have a NG Lennox G24M with a Surelight model 63k8901 circuit board. AC and Fan-only modes work fine. On increasingly rare occasions, the heating side of the furnace works but typically with the thermostat turned on to heat, the combustion blower kicks on for a second and then goes back off.
